

William Bady

Web developer

PROFILE

I am currently a student at Bencode which is a school that uses an active pedagogy. This allows me to get out of my comfort zone and challenge my learning style. I started a career in cooking which is one of my passions, but it made me realize what I really want to do: start a career in my other passion, web development. I'm thus determined and eager to learn as much and as quickly as possible in order to be able to make a living from web development.
